Livestock, Poultry, and Grain Market News

June 14, 2023

## Grain and Feedstuffs Market Trend

Compared to last period: Trade activity very light on light demand. Market uncertainty has growers and buyers struggling to agree on new crop price levels. Very few buyers actively seeking organic grain. Current cash bid prices have farmers holding out for better demand. Spot market activity too thinly traded for an accurate trend. Very few forward contracts are being procured. The next available report will be Wednesday, November 28, 2023.

## Grower FOB Farm Gate Organic Grain

Spot Transactions						Forward Contracts		Cash Bids

## Current National Drought Summary (June 6, 2023)

Heavy rains fell this week across some of the western parts of the Central and Southern Great Plains, especially in the Texas Panhandle and western Oklahoma and Kansas, leading to widespread improvements to ongoing drought in the western Great Plains. Heavy rains in the central and southern Florida Peninsula also led to improvements to ongoing drought and abnormal dryness in the southwest Florida Peninsula. Widespread degradations occurred in the Midwest and western portions of the Northeast, amid very dry and warm recent weather. In the West, some minor improvements occurred in parts of Nevada, Utah and Idaho, where high streamflows and large precipitation amounts from the winter into May led to a reassessment of conditions. Degradations were made in a few parts of western Montana and northwest Washington, where precipitation deficits mounted amid declining soil moisture and streamflow.
